We wanted the Saturn VUE to be more than just another SUV. So, before we designed it, we talked to people. We found that what most people wanted was something that's been a part of Saturn's philosophy from the beginning: simplicity. They wanted a roomy interior but weren't too fond of a "monster truck" exterior. They were enthusiastic about off-road capabilities but admitted they might not be spending too much time motoring up rugged mountain ranges. Almost everybody told us they'd prefer an SUV that was fuel efficient, environmentally sound and well equipped with safety features. And that a smooth, comfy ride never hurts. So, we designed the VUE their way. Because the VUE could have been just another SUV. But then it wouldn't have been a Saturn.

¹Suggested retail prices for Saturn vehicles as of January 2, 2002. ²Always use safety belts and proper child restraints, even with air bags. Children are safer when properly secured in a rear seat. Head Curtain Air Bags are designed to help reduce the risk of head and neck injuries to front seat occupants on the rear side of certain side-impact collisions. For more Saturn safety information, see the Owner’s Handbook.
